Differentiating Features:

The following differentiate The Cambridge Strategy from other market participants:

- *Our deep experience in managing Emerging Markets Equities and Currency strategies:* the key individuals in both our currency and emerging markets equities teams' are career professionals with a demonstrated track record of excellence and superior investment performance.
- *Our risk management techniques:* the focus on risk management is central to everything we do as a firm. We analyse our tail and extreme risk with a focus on downside risk utilising tools that have been developed internally. Risk management occurs at each step in our investment process and reflects a heuristic combination of exposure limits, stop losses and quantitative methods.
- *Research is fundamental to the evolution of our business:* We believe that our investment process and risk management tools can always be improved and have an active research programme in place to keep us ahead of our competition.
- *Our global experience and perspective:* As career asset management professionals, our experience enables us to exceed client expectations in relation to client servicing (and in particular our focus on absolute transparency with clients). We believe that by keeping clients fully informed of developments and performance we can facilitate their execution of their fiduciary duties.
